

An Active Directory Security Executive Briefing helps you obtain the executive support you need to secure your Active Directory.

An executive briefing involves a cogent high-level presentation delivered to security and management executives that provides clear insight into the central and mission-critical role that your foundational Active Directory deployment plays in the overall security of your Windows Server based IT infrastructure, and adequately conveys the need for its adequate protection.

➤ Objective

The objective of the executive briefing is to help your executive security and management executives better understand why it is absolutely important that your Active Directory deployment be adequately secured and protected at all times.

Once executives better understand how important Active Directory's role is in enterprise security, they are able to acquire, sanction and provide sufficient organizational and financial support required to implement your Active Directory security projects, which are essential to adequately protecting your Active Directory deployment, in the interest of enterprise security.

➤ Coverage

An executive briefing involves a cogent high-level presentation delivered to security and management executives that provides clear insight into the mission-critical role of your Active Directory deployment, conveys the vital need to adequately protect it, shows them the vast attack surface that it is exposed to today, sheds light on the consequences of a successful breach of your Active Directory, demonstrates the enactment of real attacks on a fictional Active Directory deployment and presents a high-level set of practical, bounded and measurable risk mitigation measures that would be sufficient to adequately protect your Active Directory deployment from the risk of compromise.

➤ Process

The Active Directory security executive briefing is delivered on-site to a set of key security and management executives in the form of a cogent two-hour presentation that adequately provides sufficient insight into all Active Directory risk management aspects. It concludes with a one hour Q&A session wherein our security professionals are available to answer any questions your executives might have on the topic.

➤ **Deliverables**

The Active Directory security executive briefing involves the delivery of an on-site security presentation to your IT and corporate security and management executives.

➤ **Logistics**

The Active Directory security executive briefing is delivered on-site. Your organization is responsible for scheduling the attendance of your IT and corporate security and management executives and for providing adequate conference facilities.

➤ **Duration**

The Active Directory security executive briefing includes a two-hour presentation and a one-hour Q&A session.

➤ **Benefits**

Our professional Active Directory security executive briefing can help you quickly obtain the executive support you need to fund your vital Active Directory security enhancement projects, essential to the safety and security of your organization.

➤ **Scheduling**

Our professional Active Directory security executive briefings are scheduled on a first-come-first-serve basis. A minimum of one week notice is required to schedule an executive briefing.

➤ **The Paramount Defenses Advantage**

Paramount Defenses Inc, a valued Microsoft partner, is a global IT security solutions company that develops and delivers innovative IT security solutions and services. It was founded by and is led by former Microsoft Program Manager for Active Directory Security and its solutions and services are deployed at and used by over 1000 organizations in 60 countries.

Our unique and professional Active Directory security services were developed by former Program Manager for Active Directory security on Microsoft's Windows Server development team, who was responsible for all aspects of Active Directory security for Microsoft Corporation.

Our security professionals possess unrivaled Active Directory security experience, and in fact only our security experts have the unique distinction of having performed a risk assessment of Microsoft Corporation's own global mission-critical Active Directory deployment.

Our experienced IT security professionals specialize in helping organizations secure their Active Directory deployments. They all possess the unique distinction of having previously worked either for Microsoft or having worked for valued Microsoft partners. Many of them earned their professional Microsoft certifications as early as 1996.

Over the last eight years, our security professionals have helped numerous organizations adequately enhance the security of their Active Directory deployments and have performed Active Directory security audits and security assessments for prominent organizations including Fortune 100 companies.
