"We are very pleased to see Paramount Defenses, a valued Microsoft partner, offer an innovative security solution (in Gold Finger) that helps enhance security and compliance in Active Directory environments."

- Charles Coates, Senior Product Manager, Identity and Security Business Group, **Microsoft**

Capability Overview

Organizations have an essential need to be able to view and export Active Directory access control lists (ACLs) so as to be able to analyze which users and groups are granted what security permissions on which Active Directory objects.

The Gold Finger Active Directory ACL Viewer and Exporter was designed to help organizations efficiently, cost-effectively and above all trustworthily view, export and easily analyze Active Directory access control lists and security permissions.

The Active Directory ACL Viewer and Exporter fully automates the object specific as well as tree wide retrieval, analysis and export of Active Directory ACLs, empowering IT personnel to easily analyze security permissions specified in Active Directory ACLs. The tool also lets IT administrators, auditors, analysts and managers export data for analysis as well as generate reports that can be furnished as evidence to demonstrate regulatory compliance.

Trustworthy Insight

When it comes to your security, accurate, trustworthy insight is paramount, because a single inaccuracy could mean the difference between being secure or vulnerable. At Paramount Defenses, we set the gold standard for trustworthiness.

Gold Finger is architected by none other than former Microsoft Program Manager for Active Directory Security so you have the assurance that it embodies authoritative expertise that you can rely on to deliver accurate, trustworthy insight. It is also 100% built in the United States, developed and tested over almost a decade, by highly proficient, experienced and trustworthy developers, 100% of whom are U.S. citizens, so you know you're running the world's most secure code. Finally, it is specially engineered to ensure that its use does not require any elevated/privileged/administrative access.

Perhaps that's why today the world's most important organizations in six continents worldwide use Gold Finger.

Licensing and Pricing

Gold Finger also offers the industry's most flexible licensing model. The Active Directory ACL Viewer and Exporter can be licensed individually or in combination with other tools in the Gold Finger suite, on both a short-term (weekly, monthly, quarterly) as well as a long-term (single/multi-year) basis. Short-term licenses are ideal for consultants and short-term projects, and long-term licenses are ideal for organizational use. A short-term license starts at US \$ 199.
