

Active Directory Executive Briefing

Active Directory Executive Briefing

As the **foundation** of an organization's cyber security, Active Directory is an extremely high-value organizational and business asset, worthy of the highest protection, and **paramount** to business.

An **Active Directory Executive Briefing** from Paramount Defenses is designed to unequivocally communicate the paramount importance of Active Directory Security to an organization's C-Suite.

- A **Paramount** Need

An organization's foundational Active Directory is the very bedrock of IT and cyber security, and the heart of privileged access (the "**Keys to the Kingdom**"), and thus its security is **paramount**.

Historically, the majority of all major recent cyber security breaches (such as JP Morgan, Target, Sony, Anthem, OPM Breach, Snowden, Avast, U.N. and others) have targeted **Active Directory** and involved the compromise/misuse of a single Active Directory privileged user account.

Thus, today more than ever, the **need** to adequately secure and defend an organization's foundational Active Directory is absolutely paramount to organizational cyber security.

However, no organization can adequately secure and defend its foundational Active Directory **without** sufficient executive support and a clear chain of accountability and empowerment.

- Overview

The **Active Directory Executive Briefing** is a high-value, executive presentation intended to help an organization's C-Suite unequivocally understand the foundational role of Active Directory in organizational cyber security and to communicate the paramount importance of its security.

Active Directory **Executive Briefing**

A Paramount Defenses **Active Directory Executive Briefing** succinctly and unequivocally conveys the paramount importance of Active Directory Security to an organization's executive leadership.

■ Why **Paramount Defenses**

Paramount Defenses was founded by and is led by former Microsoft Program Manager for Active Directory Security, the world's leading subject matter expert on Active Directory Security.

The company possesses authoritative subject matter expertise and capability in both, Active Directory Security and Privileged Access, two top areas in organizational cyber security today.

The company's flagship, Microsoft-endorsed *Gold Finger* Active Directory Audit Tooling uniquely empowers organizations to accurately and instantly identify and audit exactly who possesses what privileged access in their foundational Active Directory, thus delivering unrivaled insight.

The company's unique **Active Directory Executive Briefing** was conceived by former Microsoft Program Manager for Active Directory Security, who also has the unique distinction of having performed a risk assessment of Microsoft Corporation's Active Directory deployment.

The company's executive briefing is a high-value, one-hour presentation, delivered exclusively to an organization's C-Suite, to help them understand the foundational role of Active Directory in organizational cyber security and the paramount importance of Active Directory Security.

Over the past decade, Paramount Defenses has helped some of the world's most valuable and important organizations in six continents worldwide, including the United Nations, the United States Government, the British Government, British Petroleum, Microsoft, IBM and others.

Active Directory Executive Briefing

A Paramount Defenses **Active Directory Executive Briefing** uniquely helps an organization's executive leadership understand why Active Directory Security is paramount to organizational cyber security.

▪ Unequivocal Clarity

A Paramount Defenses **Active Directory Executive Briefing** uniquely helps an organization's C-Suite gain unequivocal clarity of the paramount importance of Active Directory Security -

1. A 30,000 feet view of the foundational role of Active Directory in IT and in Cyber Security
2. A clear understanding of how the very "**Keys to the Kingdom**" reside in Active Directory
3. An explanation of how an Active Directory breach puts the entire organization at risk
4. A simple overview of the Top-5 risks to Active Directory and their colossal impact
5. An understanding of why Active Directory security requires executive support

The Paramount Defenses **Active Directory Executive Briefing** helps an organization's executive leadership understand why Active Directory Security is paramount to organizational cyber security and why executive-level support and accountability are critical for its success.

Our unique **Active Directory Executive Briefing** helps an organization's executive leadership clearly understand why Active Directory security is mission-critical to business and why executive-level support and a clear chain of accountability and empowerment are absolutely essential for adequately securing and defending an organization's foundational Active Directory.
